

Moisture Meter for Wood and Building Material MC-411

APPLICATIONS & FEATURES

The MC-411 is used to measure the moisture level in sawn timber (also cardboard, paper) and buliding materials (plaster, concrete and mortar). Immediate display of the moisture level in the material.

Features:

- Auto Power On /Off
- Built in Calibration Test for Wood and buliding material
- Automatic Battery Warning
- Replaceable Electrodes

TECHNICAL SPECIFICATION	MC-411
MATERIALS	Wood (150 Species)
MEASURING PRINCIPLE	Resistance type
MEASURING RANGE	Wood: 6- 44 % H ₂ O Building Material:0.2 - 2.0 % H ₂ O
MEASURING GROUPS	2 (Wood/ Building Materials)
MEASURING DEPTH (FIXED)	8 mm
AUTOMATIC SHUT DOWN	After 15 Minutes
BATTERY WARNING	Yes
DISPLAY	LCD digital BAR-graph
RESOLUTION	Wood 1 % Material: 0.2%
Ambient temperature:	0 - 40°C
Ambient Relative humidity:	0 – 85 %RH
BATTERIES	3 × Cr 2032, replaceable
SIZE (L x H x D)	130 x 40 x 32 mm
WEIGHT (INCL. BATTERY)	100 g
WARRANTY	1 Year

The MC-411 is delivered with batteries.
